

CERTIFICATE OF COMPLIANCE

PPW Declaration

This certificate applies to packaging materials of Nexperia's semiconductor products placed on the market before 12 August 2026. Nexperia B.V. certifies that such packaging meets the requirements of the European Parliament and Council Directive 94/62/EC on packaging and packaging waste (PPW). This includes all primary packaging of individual sales units, secondary packaging for grouped sales units and tertiary packaging to facilitate handling and transport of a number of sales units.

Specifically, Nexperia's packaging materials meet the following essential requirements:

1. The packaging volume and weight is limited to the minimum adequate amount to maintain the necessary level of safety, hygiene, and acceptance for the packed product.
2. Packaging materials are selected to permit their reuse or recovery, including recycling, and to minimize its impact on the environment when packaging waste is disposed of.
3. The presence of noxious and other hazardous substances is minimized.
4. The sum of concentration levels of lead, cadmium, mercury, and hexavalent chromium do not exceed 100 ppm.

From 12 August 2026, Directive 94/62/EC is repealed and replaced by Regulation (EU) 2025/40 of the European Parliament and of the Council on packaging and packaging waste (PPWR). For packaging placed on the market on or after that date, see Nexperia's PPWR Packaging Conformity Statement.

This certificate is based on information available to Nexperia, including supplier material declarations, supplier certifications, material composition data, internal specifications, released product definitions, and product configuration records, as applicable. Nexperia does not perform universal independent verification of all material content for every covered article or product. This certificate applies only to covered articles or products in their original sale condition, as supplied by Nexperia and included in Nexperia's released product definition. It does not apply to customer-manufactured products, end-use applications, downstream assemblies created outside Nexperia's released product definition, or uncontrolled additions or substitutions made after Nexperia release. This certificate is for informational purposes only and does not amend or supersede any existing agreement between the parties. Nexperia's standard terms and conditions of sale apply. For further information, please
